FootBallGo supports multiple platforms:

- ✓ Web game (PC, Tablet, Mobile)

OVERVIEW

FootBallGo is a different Game - Finance ecosystem built on blockchain technology. We offer our users the opportunity to earn from the P2E mechanism through the football-themed video game. Along with that is the development of the Metaverse Version, helping users get real entertainment experiences.

FootBallGo revolves around the plot of the FootBallMetaverse planet - the dream home of football lovers.

The user's mission is to become a professional football coach. The person who leads and trains players methodically and brings glory to the team.

FootBallGo makes a breakthrough when building a comprehensive game ecosystem. In addition to the creative gameplay, the missions in the game are also extremely diverse. Especially, this ecosystem is also integrated with features such as Farming, Staking, and NFT Market.

VISION

To be the leading NFT Game in the market, offering a high investment model through entertainment experiences, FootBallGo hopes to become a Gamefi model for future NFT Game projects to be developed.

We build mechanisms to help the project operate sustainably, avoid inflation, and put Tokens to work and profit continuously in the ecosystem. Create a premise that motivates users to hold Tokens as a valuable long-term asset.

Player & Unique Character

Every player who joins the FootBallMetaverse planet is a club president and needs to create his team. Players can choose their favorite player formation based on the diverse character system. In addition to competitive activities, players can also participate in training, upgrade the team to increase the winning rate as well as the rewards.

NFT Market

A place to exchange all NFT assets in the game. The market helps connect users, creating favorable conditions to buy and sell valuable NFTs.

Metaverse Universe

FootBallMetaverse virtual universe allows users to build their world with all activities that simulate the real world such as: buying and selling real estate, upgrading, repairing facilities, expanding business activities, exchanging with other players,...

Play to Earn

FootBallGo's P2E mechanism is extremely diverse. Users can earn money from

PvE: Player Versus Environment

PvP: Player Versus Player

NFT Pool Farm

Staking

Collect and sell valuable NFTs via Market

GAME MARKET

The world had a scale of \$167.9 billion in 2020, with a CAGR of 9.24% for the period from 2021 - 2026. In which, the Asian game market in 2019 reached a scale of \$72.2 billion, equivalent to nearly 1/2 global gaming market.

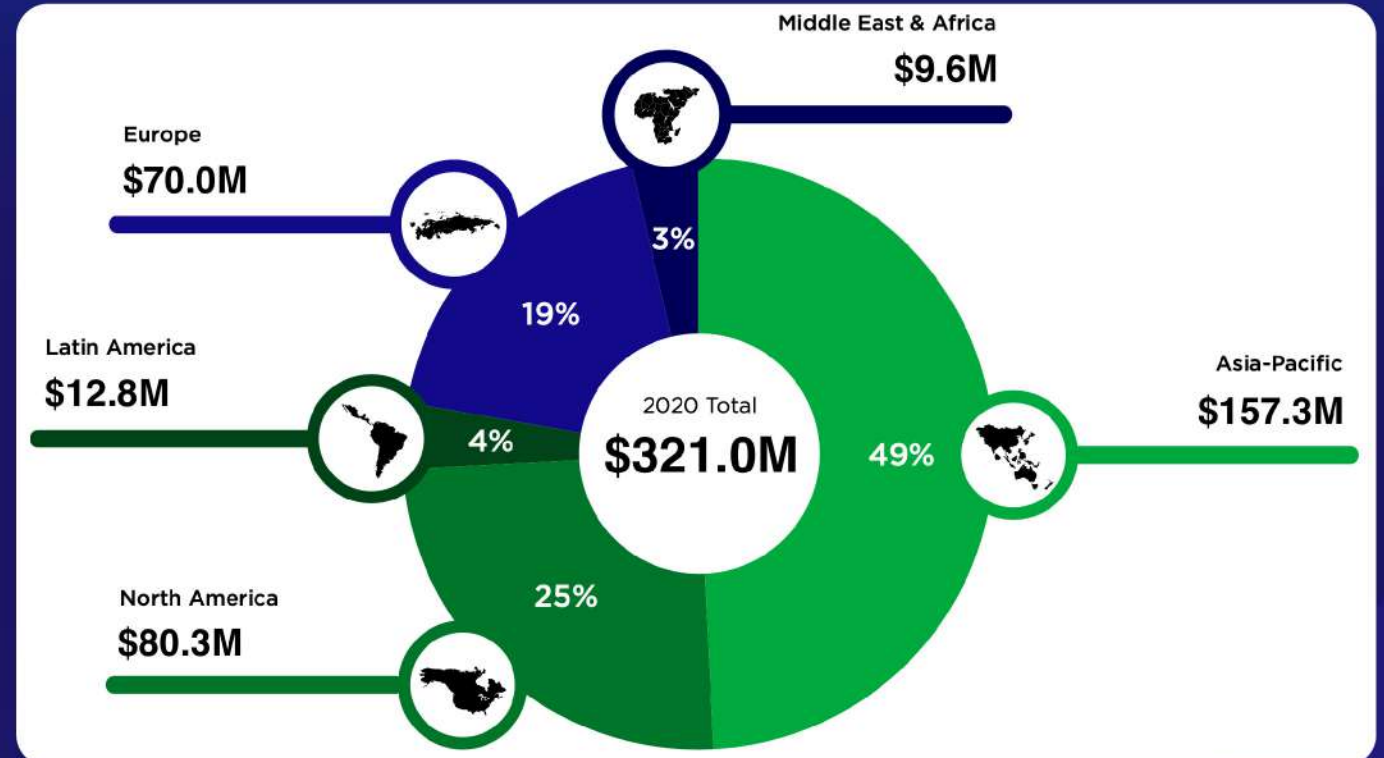

NFT MARKET

NFT MARKET CAPITALIZATION

According to a recent year-end report by NonFungible.com, the leading data provider for the NFT industry, the total market capitalization of all NFTs stood at roughly \$210 million in 2019. The report suggests this number could grow by as much as 50% in 2020 to \$315 million. By 2021, it is predicted that the NFT market will reach \$710 million.

CRYPTO GAMING PLATFORM REVENUE

Mobile games generated the highest revenue of US\$128.4 million (40%), followed by Console games with US\$89.9 million (28%), along with Downloaded/Boxed PC games, Tablet games, and Browser PC games.

The players are classified based on 3 separate indicator groups including:

Star (1-5): Star represents the rarity of the player. The higher the rarity, the better the player's strength and skill

Star 1: 50% | **Star 2:** 20% | **Star 3:** 15% | **Star 4:** 10% | **Star 5:** 5%

Level (1-5): All players start from Level 1, through practice and competition, players will improve their strength, skills, experience points, and level up.

Strength: All players start with 100% strength. During the process of participating in daily activities, the strength index is gradually depleted and needs to be recharged once every 5 days.

FootBallGo owns a rich and diverse player system with **100 characters for 15 positions**:

Goalkeeper GK	Center Back CB	Sweeper SW	Full-back/Left-back/Right-back FB LB RB	Wing back WB RWB LWB
Central Midfielder CM	Defensive Midfielder DM	Deep-lying Midfielder DLM	Box-to-box Midfielder BBM	Attacking Midfielder AM
Left/Right Midfielder LM RM	Central Forward CF	Striker ST	Second Striker SS	Winger LM FW

2 TYPE OF COMPETITION

MATCHES - PVP

- **Number of players in a match:** 5 Players
- **Time:** 5 minutes
- **Amount of Tokens to receive when winning:** The number of bonus Tokens is calculated for each player unit, depending on each player's Star and Level.
- **Win/Loss Ratio:** The win/loss ratio is calculated on the value of your team compared to the competitor.
- You need to come up with the most reasonable strategy to increase your winning rate. During the game, you do not have the right to change players on the field, so try to arrange the best formation right before the game starts.
- During the match, the system will always update the indicators so that players can analyze for the next matches such as number of kick-offs, number of shoots, number of goals,...

PENALTY - PVE

Every day, your players need to participate in Penalty competitions with the system's talented goalkeepers to receive more EXP and Reward points. The goalkeepers are divided by rank, the better the goalkeeper, the lower your win rate, and the higher the bonus you will receive. The penalty is an independent competition, you only need 1 player to participate in this mission.

Always consider the level of your players and the goalkeepers to choose the best win-rate!

ITEM SYSTEM

- **Strength Card:** Provide active energy for players. Strength Cards are sold for each Star separately with corresponding prices. Cards can be stored, accumulated, and used for 5 days per card.
- **EXP+ Card:** EXP+ Card helps users level up players without competing. EXP+ Cards are sold for each Star - Level separately with corresponding prices.
- **STAR+ Card:** The STAR+ Card allows users to level up players' Stars in their team. STAR+ Cards are sold by Star, not by Level. When combining players of the same Star level (regardless of Level) with the upgrade card, users can get a new player with a Star level higher.
- **PLUS+ Card:** The PLUS+ Card allows players to participate in training and competitions to upgrade Star and receive Token rewards. PLUS+ Cards are sold by Star (from 1-5), regardless of Level.

VIRTUAL REAL ESTATE SYSTEM

Users need to own real estate on the FootBal Metaverse planet to start laying the foundation for their team. The real estate will also be divided by level, location, area,...

Owning real estate, users have the basis to build business and entertainment spaces such as stadiums, houses, practice places, competitions for players,...

This will be one of the key assets in our Metaverse version!

GAME OPERATION

- Users need to swap BNB to FGSPORT Token on exchanges
- Connect your BEP20 wallet to FootBallGo platform
- Buy Real Estate and player cards. Users need to own at least 1 player to participate in the competition

MARKETPLACE - TRANSFER MARKET

The Transfer Market allows users to sell any NFT assets in their Game for the desired price. This place will open up a wide connection, help buyers and sellers easily find suitable players and real estate.

The stores on Market are optimally designed with smart search filters. With a cunning business mind, you will definitely become a rich merchant on Transfer Market.

STAKING

After getting FGSPORT from the competition, take advantage of Staking to make your assets profitable.

Users can stake directly on the FootBallGo platform with an average APY of 100% per year.

NFT FARMING

NFT Farming is a pool farm that allows users to use their NFTs to participate. NFT Farming can help users earn more Tokens, players, item cards, ... even when you are not directly playing the Game and can be profitable even while sleeping.

FGSPORT TOKEN

FootBallGo is an ecosystem with many features combined on the same platform. And FGSPORT is the Token used for all activities on this ecosystem. With FGSPORT, players can use their Tokens to make profits through many different ways such as Staking, Farming, Gaming...

FGSPORT is built based on the standards BEP20 token on the Binance Smart Chain platform and is controlled by smart contracts.

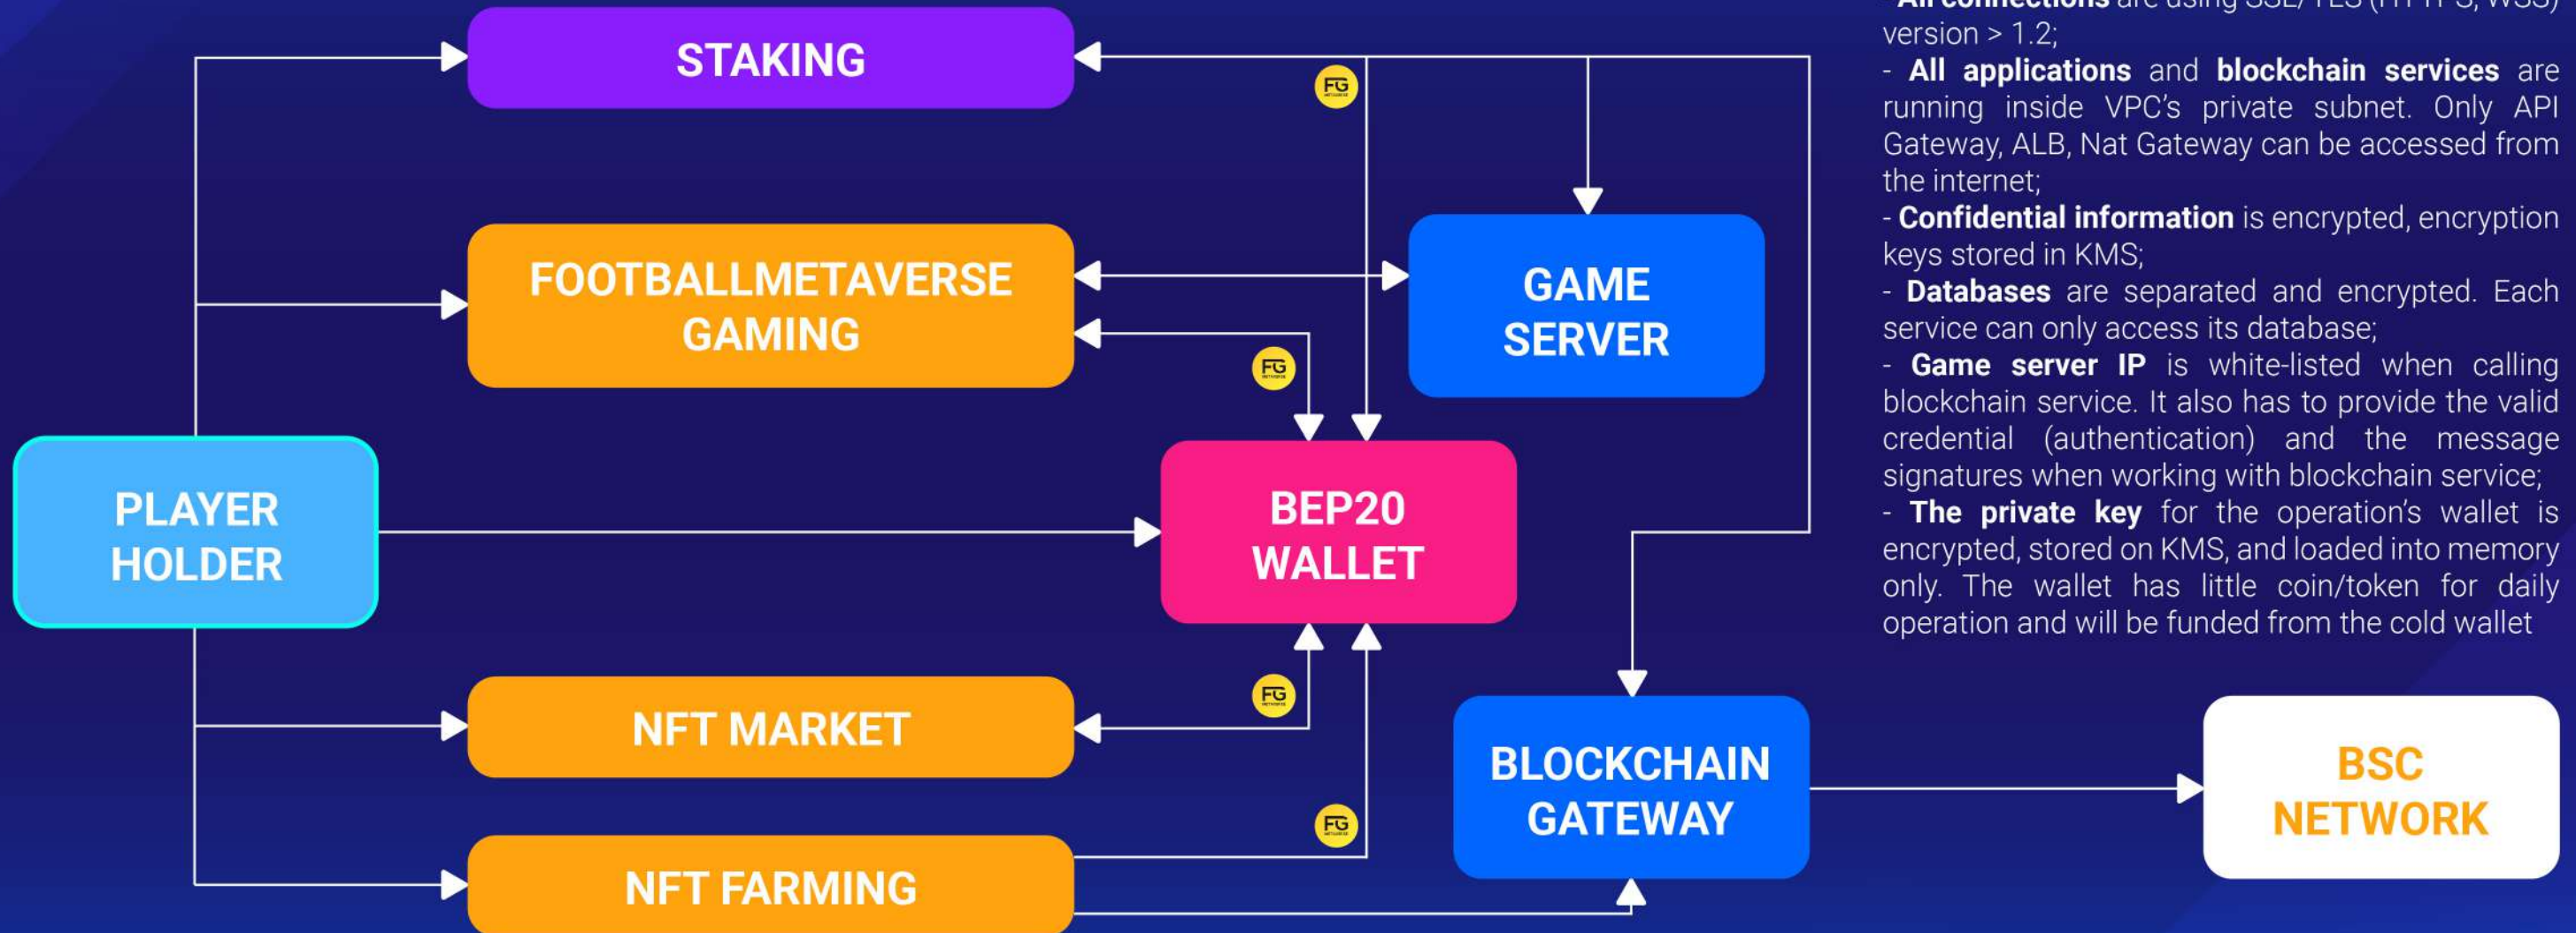

This token is used for:

- **Buy virtual real estate:** NFT assets start at the beginning of the game.
- **Buy player cards:** Users buy player cards from the Store and open random cards to receive their player. You need to own at least 5 players to be able to participate in the competition.
- **Buy item cards:** There are 3 types of item cards including EXP+, STAR+, PLUS+ to help you increase the player's strength stats. Use item cards to increase your winning rate.
- **Rewards:** FGSPORT is a Token that rewards when a player wins a competition or completes tasks.
- **Staking:** If you don't want to play the game, Staking is an easy way to earn more Tokens to your wallet
- **NFT Farming:** This is a huge new feature on our platform. By joining NFT Farming, users can receive Tokens or bonus items. The term and profit for Farming are extremely flexible and attractive.
- **Exchange:** Buy, sell and exchange on decentralized exchanges.

OPERATING FLOW OF FGSPORT

X100	\$0.2	\$36,600,000	Initial Market Cap
X150	\$0.3	\$54,900,000	\$366,000

PROFIT ALLOCATION

We are ready for a long-term development plan in the future, so the FootBallGo team will spend 100% of the profits earned from the project to reinvest in development activities as follows:

- **25% Buyback:** Maintain and stabilize the Token price
- **30% Marketing:** Engage and further expand the FootBallGo community. Having more marketing activities on major news sites.
- **35% R&D:** FootBallGo spends a large part of its profits on R&D, research, and develop new technology platforms, features, and games. Our goal is to become the NFT Game with the largest number of users in the market by the end of 2022.
- **10% Ingame Event:** Profit will be converted into Reward for ingame Event, increasing benefits for users.
